

# The KIRA clean is an ozone water generator which can be used by anyone to disinfect and deodorize easily.

## Great activity in various scenes!!

- Commercial kitchens and garbage dumps in a super markets, eating places, hotels, school and hospitals.
- Feeding centers, prepared food shops and luncher treats precut vegetables and non-heated food. Food processing factories treat such as noodle making, bread making and confectionary production.
- Fresh foods such as dressed meats and fresh fish. Food processing factories treat pickles and bean curd.
- Wash place, bath and drain ditch in the hot bath facilities.
- Community facilities like laboratories in the highway parking spots.

※Concurrent use at two place is not available.

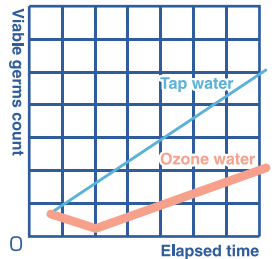

## Food-deinfection, such as vegetables

### disinfection without chemicals

Ozone water is excellent at disinfecting power and quite useful against Bacillus coli, Salmonella, Staphylococcus aureus and Vibrio parahaemolyticus. After disinfecting, it can be resolved by itself into water and air. There is no residual material at all; therefore, it being human & environmental-friendly.

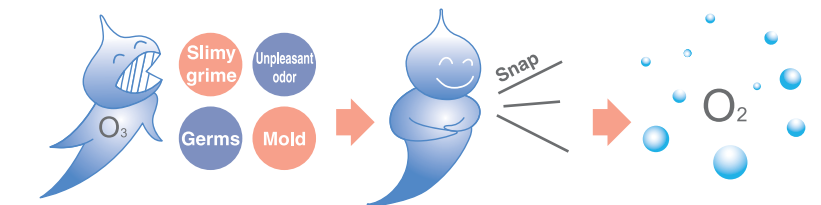

### keeping foods fresh

Washing vegetables, fruits, and fish prevents spreading of bacteria and it keeps foods fresh without residual material.

### Deodorizes and removes slimy grime

Besides disinfecting, it has deodorizing effects. It effectively acts on cooking utensils and ingredients it selves, also removes unpleasant odor and grim from disposal and drain. These environment improvements prevent vermin breeding.

## Easy and convenient system, KIRA clean!

**High performance**

### Water-cooling function (patented) permits continuous using

Abundant in flow rate is 8.5L/per minute and ozone water density is high in 0.6ppm~0.8ppm. It can be unaffected by season and water temperature, and it keeps ozone water density stable and high, which is best suit to disinfect and deodorize. Water-cooling function permits continuous using.

**Easy to place**

### Any one can place it only by one minute!

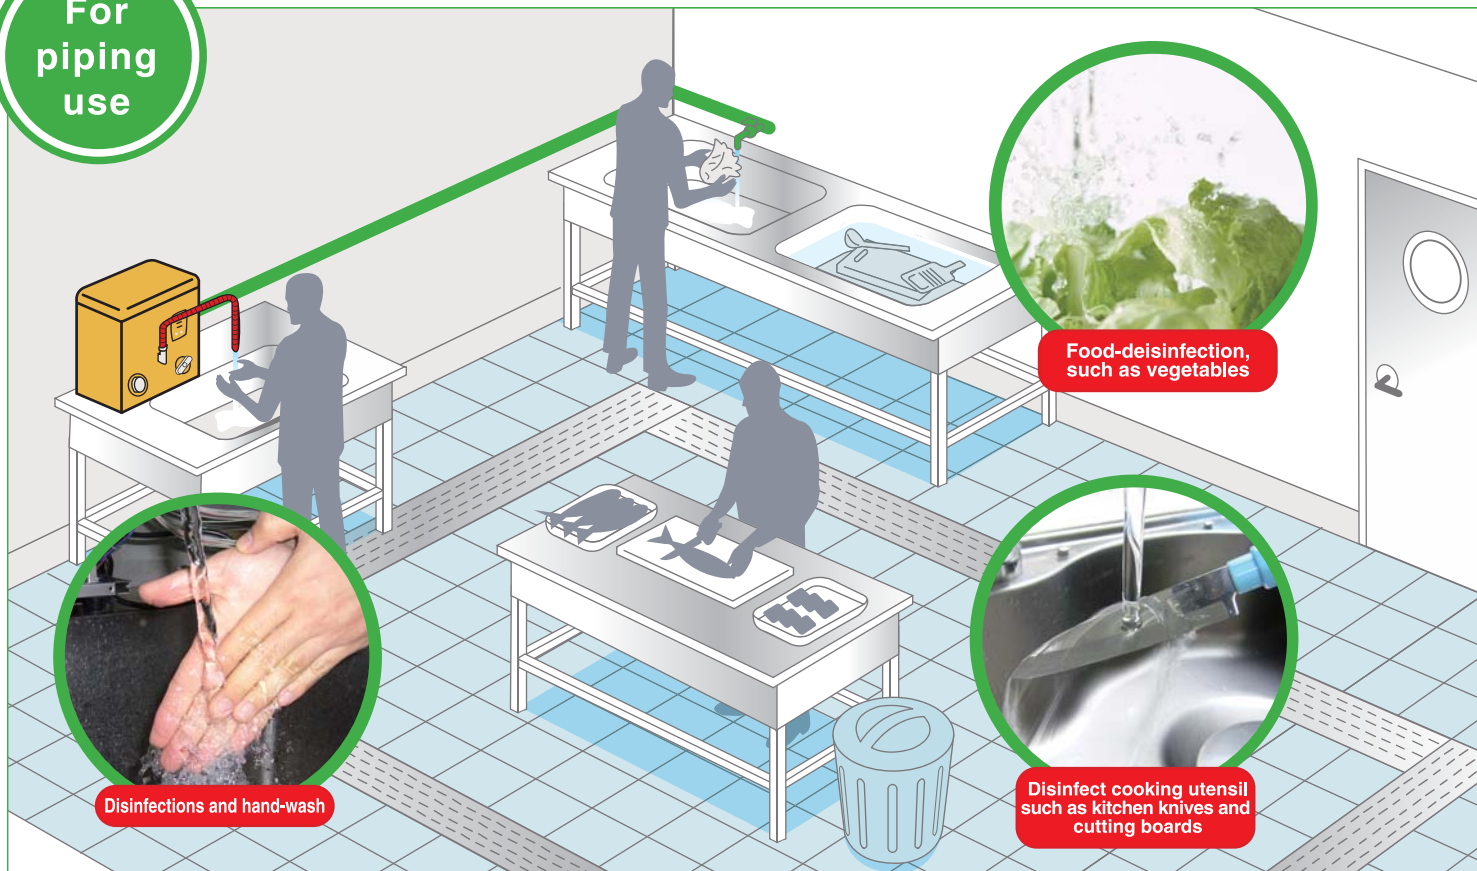

Thanks to the provided standard connection kit anyone can set up easily and construction-free. Also it requires to expertise and saves your extra expenditure.

**Compact**

### Lightweight and compact design enables you to set anywhere you want

Total size is W300×D150×H300mm and weighting approximately 10kg save space and enable easily using. Of course, maintenance also is easy.

**For piping use**

**For hose use**
