

Standard type based on more than ten thousand of our delivery recor. Best assured way to disinfect and prevent mold.

**Ag+filter** (removes dust)

Anti-bacterial filter Ag+silver ion filter

**Fan** (forced circulation)

Single fan enhances circulative efficiency.

**BODY**

**Sexangular body enhances effect of disinfections**

Silver ion processed stainless and cleanliness SUS304

**Big-sized quartz UV lamp** (constantly disinfects)

140W constantly lights

**Big-sized quartz ozone lamp**

(high power fumatory disinfection under unmanned condition)

140W/ for fumatory disinfection under unmanned condition

**Middle-sized quartz UV lamp**(constantly lights)

60W×3/24hours lighting for both manned and unmanned condition.

**Space Clean MTS**

Installation case examples

Switch box for changing operation

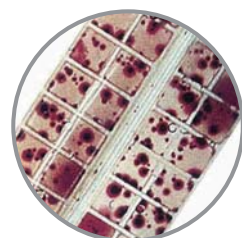

**Proven effectiveness**

**Inspection data of packaging room in a prepared foods factory.**

Packaging room in a prepared foods factory installed TM-140N. (290m<sup>2</sup>) Inspection data of floating fungus in a room.

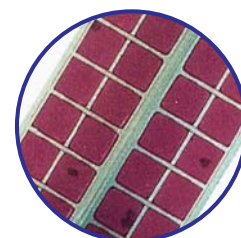

- Test method**
- Using RCS air sampler
  - Sampling time in 4 minutes
  - extract fungus from 1? indoor sample and cultivate it at 25?(72hours)

**Before installation**

Number of the Colony: 385

**After installation**

Number of the Colony: 8

**Main for disinfect and prevent mold**
